

A natural approach to edible oil refining

Geohellas provides natural bleaching earths that help edible oil producers set higher quality standards for their output at peak production efficiency, while addressing environmental concerns and meeting processing regulations.

Geohellas's activated natural bleaching earth products make for effective but mild bleaching, ensuring reduction of oil loss. By offering a product range that makes nutritional, environmental and economical sense, Geohellas helps producers get the most value out of their refining process.

Bleaching earths for edible oil refining: MAK®

Our MAK® activated natural bleaching earths are recognised for their high quality and consistent performance. They enable mild, yet efficient, bleaching of edible oils, reducing oil loss and increasing the rate of filtration.

About Geohellas

The exclusive European source for attapulgite clay and custom attapulgite/saponite blends, Geohellas is an industrial minerals company whose abundant mineral resources are complemented by professional strength in depth. Featuring an expert, dedicated R&D department and leading-edge manufacturing facilities, Geohellas delivers an expanding portfolio of superior technical clay products that enhance product quality and performance for clients in various business sectors.

The Geohellas team is committed to improving the performance, efficiency and output of our customers' products. This value-adding approach has secured for Geohellas a growing industry reputation. Moreover, Geohellas has established an advanced quality management system to guarantee consistently excellent quality for all its products, a system that conforms to the ISO 9001/2008 norms as certified by Germanischer Lloyd.
